RQ-8Y

Side-Seal Model

■ FAST!

1.7 seconds per strap (equivalent to 35 straps per minute).

■ ADAPTS EASILY TO AUTOMATED PACKAGING LINES

The machine fits any existing or proposed conveyor system without modification, adapts to any conveyor height and requires no special equipment.

■ WIDE ADAPTABILITY TO FULLY-AUTOMATED PACKAGING LINES

End-of-cycle and strapping error signals are available as options. Larger arch sizes offer a wide range of applications, particularly for large and heavy packages.

■ EASY STRAP LOADING

No complicated strap threading. It only requires a touch of the outside lever.

■ VARIABLE TENSION

A single dial provides a wide range of tension for all packages. Tension adjustable up to 80kg (175lbs.), equivalent to 150mm (6 inch) stroke.

■ QUICK HEATER

In less than 25 seconds, operating temperature is reached.

■ EMPTY STRAP COIL DETECTION

Operation automatically stops when the strap coil is empty plus an optional warning signal is available. Easy removal of any excess strap ensures uninterrupted operation.

■ RE-FEED FUNCTION

Features automatic resetting of the machine for continuous operation even if a strap forwarding failure were to occur.

■ AUTOMATIC STRAP EJECTION

If a strap cycle is accidentally started without a package, empty strap loops are automatically ejected and all functions are reset for the next cycle.

■ SELF-DIAGNOSTIC MECHANISM

A programmable microprocessor constantly monitors critical functions — any irregularity detected is immediately displayed.
